

## Contents

### Volume 1

Foreword *xvii*

Preface *xix*

### Section I Interplay of Light and Matter 1

**1 Physicochemical Aspects of Photoswitching 4**

*Petr Klán and Jakob Wirz*

**2 Computational Methods and Photochromism 20**

*Martial Boggio-Pasqua*

### Section II Chemical Classes of Molecular Photoswitches 39

**3 Azobenzenes: The Quest for Visible Light Triggering 42**

*Vanessa Koch and Stefan Bräse*

**4 Diazocines: Photoswitches with Excellent Photophysical Properties and Inverted Stabilities 66**

*Rainer Herges and Pascal Lentz*

**5 Azoheteroarenes 84**

*Jake L. Greenfield, Aditya R. Thawani, Magdalena Odaybat, Rosina S.L. Gibson, Thomas B. Jackson, and Matthew J. Fuchter*

**6 Arylhydrazones 114**

*Baihao Shao and Ivan Aprahamian*

**7 Spiropyran – Multifaceted Chromic Compounds 132**

*Luuk Kortekaas and Wesley R. Browne*

- 8 **Diarylethenes – Molecules with Good Memory** 152  
*Igor V. Komarov, Sergii Afonin, Oleg Babii, Tim Schober, and Anne S. Ulrich*
- 9 **Fulgides and Fulgimides** 178  
*Falk Renth and Friedrich Temps*
- 10 **The Negative Photochromism of Dimethyldihydropyrene  $\pi$ -Switches** 194  
*Subhajit Bandyopadhyay*
- 11 **Chiroptical Molecular Switches and Motors** 214  
*Brian P. Corbet, Anouk S. Lubbe, Stefano Crespi, and Ben L. Feringa*
- 12 **Stilbenes Revisited: Understanding the Mechanism of Mechanochemical Coupling** 254  
*Robert T. O'Neill and Roman Boulatov*
- 13 **Indigoid Photoswitches** 284  
*Thomas Bartelmann and Henry Dube*
- 14 **Donor–Acceptor Stenhouse Adducts** 304  
*Friedrich Stricker, Serena Seshadri, and Javier Read de Alaniz*
- 15 **Imines as Threefold Functional Devices: Motional, Photochemical, Constitutional** 326  
*Lutz Greb, Ghislaine Vantomme, and Jean-Marie Lehn*
- 16 **Norbornadiene/Quadracyclane (NBD/QC) and Conversion of Solar Energy** 352  
*Jessica Orrego-Hernández, Helen Hölzel, Zhihang Wang, Maria Quant, and Kasper Moth-Poulsen*
- 17 **Dihydroazulene/Vinylheptafulvene (DHA/VHF) and Molecular Electronics** 380  
*Martina Cacciarini and Mogens B. Nielsen*
- 18 **Emerging Molecular Photoswitches** 402  
*Peter Gödtel and Zbigniew L. Pianowski*
- 19 **Photochromism of Coordination Compounds** 426  
*Nathan Man-Wai Wu, Chi-Chiu Ko, and Vivian Wing-Wah Yam*
- 20 **Versatile Photoswitchable Molecules in Catalysis** 456  
*Jie Li and Stefan Hecht*

## Volume 2

Foreword xvii

Preface xix

## Section III Materials Based on Molecular Photoswitches 477

- 21 **Multinary Photoswitches** 480  
*Andreas H. Heindl and Hermann A. Wegner*
- 21.1 Introduction 480
- 21.2 Multinary Photoswitches 481
- 21.2.1 Basic Concepts in the Design of Multiphotoswitches 481
- 21.3 Dithienylethene Multiphotoswitches 483
- 21.4 Azobenzene Multiphotoswitches 485
- 21.4.1 Acyclic Oligoazobenzenes 485
- 21.4.2 Macrocyclic Azobenzenes 489
- 21.5 Multiphotoswitches Composed of Different Photoswitches 493
- 21.6 Conclusion 495
- References 496
- 22 **Photoinduced Reversible Solid-to-Liquid Transitions of Photochromic Materials** 500  
*Chengwei Liu, Shaodong Sun, and Si Wu*
- 22.1 Introduction 500
- 22.2 Melting Points of Azobenzene Small Molecules in *Trans* and *Cis* Form 501
- 22.3 Photoinduced Reversible Solid-to-Liquid Transitions of Azobenzene Small Molecules 501
- 22.4 Photoinduced Reversible Solid-to-Liquid Transitions of Polymers Based on Photoswitchable Glass Transition Temperatures 504
- 22.5 The Mechanism of Photoinduced Reversible Solid-to-Liquid Transitions of Azopolymers 518
- 22.6 Comparison of Reversible Solid-to-Liquid Transitions with Directional Photofluidization 519
- 22.7 Summary and Outlook 520
- Conflicts of Interest 520
- Acknowledgments 520
- References 520
- 23 ***En Route* to Ultrafast Switchable Azo Dyes** 524  
*Jaume Garcia-Amorós and Dolores Velasco*
- 23.1 Light and Photoresponsive Materials 524
- 23.2 Photoswitchable Azo Dyes for Real-Time Information Transmission 525

- 23.3 The Starting Grid: Toward the Millisecond Timescale 526
- 23.4 The Race Continues: The Micro- and Nanosecond Timescale 530
- 23.5 Pressing Down the Throttle: Beyond the Nanosecond Timescale 534  
References 537
- 24 Photoswitchable Ion Receptors 542**  
*Alketa Lutolli and Amar H. Flood*
- 24.1 History, Development, and Concepts 542
- 24.1.1 The First Synthetic Photoswitchable Ion Receptor 542
- 24.1.2 Ion Receptors 543
- 24.1.3 Photoswitches Develop Along with Molecular Machines 543
- 24.1.4 From Receptor- and Guest-Driven Design to Photoswitchable Receptors 543
- 24.1.5 Motivations and Applications: Demonstrations Vs. Real-World Application 546
- 24.2 Classes of Photoswitchable Receptors 546
- 24.2.1 Photoswitchable Chelates for Anion Binding 546
- 24.2.2 Transition-Metal Complexes as Chelates 549
- 24.2.3 Macrocyclic Receptors 550
- 24.2.4 Photoswitchable Foldamers 552
- 24.2.5 Photoactive Cages 557
- 24.3 Conclusions 558  
Acknowledgments 559  
References 559
- 25 Molecular Switches in Light-Responsive Liquid-Crystalline Polymer Actuators 566**  
*Albert P. H. J. Schenning, Hong Yang, Sebastian Fredrich, and Li Liu*
- 25.1 Light-Responsive Soft Actuators 566
- 25.2 Liquid-Crystal-Based Polymers in Light-Responsive Soft Actuators 566
- 25.3 Photoswitches in Light-Responsive Soft Actuators 569
- 25.4 Light-Responsive Soft Actuators and Their Applications 574
- 25.5 Conclusion and Outlook 575  
References 575
- 26 Molecular Photoswitches in Liquid Crystals 580**  
*Alexander Ryabchun and Nathalie Katsonis*
- 26.1 Introduction 580
- 26.2 Liquid Crystals 581
- 26.3 Photochromic Switches Can Regulate Phase Behavior 582
- 26.4 Photochromic Switches Can Regulate Molecular Alignment 585
- 26.5 Photochromic Switches Can Engineer Helical Organizations in Cholesteric Liquid Crystals 588
- 26.6 Liquid Crystals Amplify the Motion of Molecular Switches Across Length Scales 593
- 26.7 Conclusion 596  
References 596
- 27 Photoswitchable Fluorophores for Super-Resolution Optical Microscopy 606**  
*Kakishi Uno, Vladimir N. Belov, and Mariano L. Bossi*
- 27.1 Introduction: Targeted and Stochastic Methods of Optical Super-Resolution 606
- 27.2 Specific Properties Required for Optimal Performance 608
- 27.3 Design of Photoswitchable Fluorescent Compounds 610
- 27.4 Examples 612
- 27.4.1 Spiropyranes and Spiroanthoxazines 612
- 27.4.2 Photoactivatable Spiroamides 614
- 27.4.3 Photochromic and Fluorescent Diarylethenes 617
- 27.5 Conclusions and Outlook 622  
References 623
- 28 Photochromic Nanoparticles: From Fluorescence to Assembly 628**  
*Rémi Métivier, Nicolas Fabre, Ashkan Mokhtar, and Tuiyoshi Fukaminato*
- 28.1 Introduction 628
- 28.2 Photochromic Nanoparticles 630
- 28.3 Nanosystems Involving Photochromic Molecules and Organic Fluorophores 634
- 28.3.1 “ON-OFF” Photoswitchable Fluorescent Nanoparticles 635
- 28.3.1.1 Silica Nanoparticles Embedding Photochromic and Fluorescent Dyes 635
- 28.3.1.2 Photochromic–Fluorescent Polymer Nanoparticles 637
- 28.3.1.3 Photochromic and Fluorescent Nano-Aggregates 639
- 28.3.2 Nanoparticles with Fluorescence Color Modulation 641
- 28.4 Nanosystems Involving Photochromic Molecules and Inorganic Emitters 646
- 28.4.1 Photochromic Nanoparticles Based on Quantum Dots (QDs) Emitters 647
- 28.4.2 Photochromic Nanoparticles Based on Carbon Dots (CDs) Emitters 652
- 28.4.3 Photochromic Nanoparticles Based on Upconversion Nanoparticles (UCNPs) 655
- 28.5 Nanoassemblies Involving Photochromic Molecules and Metallic Nanoparticles 660
- 28.5.1 Metallic Nanoparticles Functionalized by Photochromic Molecules 660
- 28.5.2 Metallic Nanoassemblies Modulated by Photochromic Molecules 661
- 28.5.2.1 Assembly–Disassembly of Metallic Nanoparticles by Photochromic Molecules 661
- 28.5.2.2 Conductance Photoswitching of Photochromic-Metallic Nano-Networks 666

28.6	Conclusion	667
	References	668
<b>29</b>	<b>Photomechanical Performance of Diarylethene Single Crystals</b>	<b>680</b>
	<i>Masakazu Morimoto</i>	
29.1	Introduction	680
29.2	Single-Crystalline Photochromism of Diarylethene	681
29.3	Photoinduced Surface Morphology Change of a Diarylethene Single Crystal	683
29.4	Photoinduced Shape Changes of Diarylethene Single Crystals	684
29.5	Light-Driven Molecular Crystal Actuators	687
29.6	Summary and Outlook	691
	References	691
<b>30</b>	<b>Light-Responsive Metal–Organic Frameworks Based on Photochromic Molecules</b>	<b>696</b>
	<i>Zejun Zhang, Yunzhe Jiang, Peng Qin, and Lars Heinke</i>	
30.1	Introduction	696
30.1.1	Photochromic Molecules as Guests in the Pores	697
30.1.2	Photochromic Groups Pendant to the Framework	699
30.1.3	Photoswitchable Moieties in the MOF Backbone	700
30.2	Photoswitchable Host–Guest Interaction	700
30.2.1	Photoswitching the Uptake and Release	701
30.2.2	Photoswitching the Diffusion in the Pores	702
30.2.3	Photoswitching the Membrane Permeation and Separation	702
30.2.4	Photoswitching Energy Transfer and Catalysis	703
30.3	Conduction Photoswitching	704
30.3.1	Photoswitching Electronic Conduction	704
30.3.2	Photoswitchable Protonic Conduction	704
30.4	Conclusions	706

#### Section IV Photomodulation of Biological Systems 811

<b>34</b>	<b>In Vivo Applications of Photoswitchable Bioactive Compounds</b>	<b>814</b>
	<i>Alexandre M.J. Gomila and Pau Gorostiza</i>	
34.1	Photocontrol of Biological Processes	814
34.2	Irreversible Photopharmacology – Cages	818
34.3	Reversible Photopharmacology. Free and Tethered Photochromic Ligands	822
34.3.1	Cancer and Cytotoxicity	823
34.3.2	Photopharmacology of Receptors and Ion Channels	825
34.3.3	Protein and Gene Expression with Photoswitches	830

- 34.3.4 Restoring Vision – Ion Channels and Switches 831
- 34.4 Antibiotics and Insecticides in Photopharmacology 832
- 34.5 Concluding remarks 833  
References 834
- 35 Molecular Photoswitches in Antimicrobial Photopharmacology 844**  
*Mafalda Bispo, Jan Maarten van Dijl, and Wiktor Szymanski*
- 35.1 Introduction 844
- 35.2 Antimicrobial Photopharmacology 845
- 35.3 Photoswitchable Small-Molecule Antibiotics 847
- 35.4 Photoswitchable Peptidic Antibiotics 855
- 35.5 Other Applications of Molecular Photoswitches in the Context of Bacterial Infections 859
- 35.6 General Discussion and Outlook on Related Technologies 860
- 35.6.1 Antimicrobial Photopharmacology and Photodynamic Therapy: Similarities and Synergies 862
- 35.6.2 Antimicrobial Photopharmacology and Medical Imaging 864
- 35.6.3 Concluding Remarks 865  
References 865
- 36 Photoswitchable Cytotoxins 874**  
*Oliver Thorn-Seshold*
- 36.1 Introduction 874
- 36.1.1 The Rewards of Photoswitchable Cytotoxins 874
- 36.1.2 Scope of This Chapter 875
- 36.2 Photoswitchable Cytotoxins: Applications, Challenges, and Design 877
- 36.2.1 The Spatiotemporal Specificity Needed for Photoswitchable Cytotoxins 877
- 36.2.2 Use of Photoswitchable Cytotoxins in 2D 878
- 36.2.3 Opportunities and Limitations of Photoswitchable Cytotoxins in 3D 879
- 36.2.4 Practical Considerations for Optical Methods 881
- 36.2.5 Mechanism of Action Testing and Off-Target Effects 882
- 36.2.6 General Design Features of PSCs 885
- 36.3 Photopharmaceutical Analogs of Cytotoxic Drugs 887
- 36.3.1 Microtubule Structure and Dynamics (Antimitotics) 887
- 36.3.1.1 Microtubule Stabilizers: Taxanes and Epothilones 887
- 36.3.1.2 Microtubule Destabilizers 1: Combretastatins and Azocombretastatins 889
- 36.3.1.3 Microtubule Destabilizers 2: Heteroaryl Colchicine Analog PSCs 894
- 36.3.2 Actin Structure and Dynamics 897
- 36.3.3 DNA Synthesis and Integrity (Antimetabolites and DNA Lesion Agents) 899
- 36.3.4 Protein Degradation 902
- 36.3.5 Apoptosis 904
- 36.4 Selected Photopharmaceuticals with Cytotoxic Potential Against Defined Targets 904
- 36.4.1 KDAC Enzymatic Activity (HDACs and SIRT6) 904
- 36.4.2 Kinase Activity 906
- 36.5 Selected Toxic Photopharmaceuticals Acting Against Less-Defined or Cell-Type-Specific Targets 907
- 36.5.1 Membrane Porosity (Cytolytic Toxins) 907
- 36.5.2 Agents with In Vivo Lethality (Neurotoxins/Myotoxins) 909
- 36.5.3 The Underutilized Potential of Ring-Opening/-Closing Photoswitches 910
- 36.6 Outlook for Photoswitchable Cytotoxins 911  
Acknowledgment 913  
References 914
- 37 Photopharmacology of G-Protein-Coupled Receptors 922**  
*Silvia Panarello, Xavier Rovira, Amadeu Llebaria, and Xavier Gómez-Santacana*
- 37.1 Introduction 922
- 37.2 Enabling Light as an Actuator for GPCR Research 923
- 37.2.1 Optogenetics-Like Approaches 923
- 37.2.2 GPCR Photopharmacology Approaches 924
- 37.2.2.1 Freely Diffusible Photopharmacology 924
- 37.2.2.2 GPCRs Tethered Photopharmacology 926
- 37.3 Characterization of GPCR Photopharmacological Tools 929
- 37.3.1 Photoisomerization and Uncaging Characterization 929
- 37.3.1.1 UV-vis Spectroscopy 929
- 37.3.1.2 LC/PDA/MS 930
- 37.3.1.3 NMR 930
- 37.3.2 Characterization of the Receptor Photoswitching 930
- 37.3.2.1 Kinetic Functional Assays 931
- 37.3.2.2 Endpoint Functional Assays 933
- 37.3.2.3 Conformational Assays 934
- 37.3.2.4 Binding Assays 935
- 37.4 T-on/M-on Photochromic Ligands 935
- 37.5 Translation to In Vivo and Therapeutic Prospects 938
- 37.6 Concluding Remarks and Future Perspectives of Photopharmacology 939  
References 941
- 38 Photoswitching of Ion Channels 946**  
*Timm Fehrentz and Johannes Broichhagen*
- 38.1 Introduction 946
- 38.1.1 Ion Channels and Their Function in Excitable Tissue 946
- 38.1.2 Electrophysiology: Patch Clamping and Other Methods 948

38.1.3	Neurons	949
38.1.4	Cardiomyocytes	950
38.1.5	Pancreatic $\beta$ -Cells	951
38.2	Principle of Photopharmacology	951
38.2.1	Historical and Modern Genetic Strategies	951
38.2.2	Chemical Strategies	953
38.2.2.1	Caged Compounds	953
38.2.2.2	Photochromic Ligands (PCLs)	953
38.2.3	Photoswitchable Tethered Ligands (PTLs)	954
38.3	Photoswitchable Ion Channels	955
38.3.1	Photopharmacology in Neurons and in the Brain	955
38.3.1.1	SPARK and AQs	955
38.3.1.2	Ionotropic Glutamate Receptors	957
38.3.1.3	Ionotropic GABA Receptors	958
38.3.1.4	Other Channels: Nicotinic Acetylcholine Receptors, TREK1 and GIRKs	959
38.3.2	Photopharmacology on Cardiomyocytes and in the Heart	959
38.3.2.1	LTCC Control with FHU-779	959
38.3.2.2	AAQ Application	960
38.3.3	Photopharmacology on Pancreatic $\beta$ -Cells	961
38.3.3.1	K <sub>ATP</sub> Control with JB253 and JB558	961
38.3.3.2	LTCC Control with FHU-779	962
38.4	Outlook	962
38.4.1	Targeting of Photopharmaceuticals	963
38.4.2	Light Delivery	963
