

# Contents

<b>1 Introduction</b> .....	1
1.1 Introduction .....	1
1.2 Chapters' Overview .....	3
References .....	4
<b>2 Bird's-Eye View on Dynamical Systems</b> .....	7
2.1 Definitions and Elementary Properties .....	7
2.2 Induced Spaces .....	15
2.3 Enveloping Semigroups .....	16
2.3.1 Some Basic Theory .....	16
2.3.2 Function Spaces .....	24
2.4 Symbolic Dynamics .....	26
References .....	30
<b>3 Dynamics of Induced Systems</b> .....	33
3.1 For (semi)Cascades .....	34
3.2 For (semi)Flows .....	39
References .....	43
<b>4 Dynamical Properties of Enveloping Semigroups</b> .....	45
4.1 Recurrence in Enveloping Semigroups .....	45
4.2 Periodic Points for Enveloping Semigroups .....	46
4.3 Finite Minimal Ideals in Enveloping Semigroup and Proximal Relations .....	49
4.4 Variations of Transitivity for Enveloping Semigroups .....	56
4.4.1 Transitive Enveloping Semigroups .....	57
4.4.2 Stronger Forms of Transitivity for Enveloping Semigroups .....	59
References .....	61

<b>5 Enveloping Semigroup of the Induced Systems</b> .....	63
5.1 Inducible Mappings .....	63
5.2 Enveloping Semigroup of $(2^{\mathbf{Z}}, \sigma)$ , Its Subshifts and of $(2^{2^{\mathbf{Z}}}, \sigma_*)$ ....	71
5.2.1 Isomorphism of $\beta\mathbf{Z}$ and $\beta n\mathbf{Z}$ , $\forall n \in \mathbf{N}$ .....	76
5.3 Saturated Enveloping Semigroups .....	78
References .....	80
