

# Contents

<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Classical Entropy and Divergence</b>	7
2.1	Classical State and Dynamics	7
2.2	Shannon Entropy and the KL Divergence	8
2.3	Rényi Entropy and Divergence	11
2.4	General Classical Divergences	13
2.5	Fisher Information	16
<b>3</b>	<b>Classical Majorization</b>	21
3.1	Majorization	21
3.2	d-Majorization and Thermo-Majorization	24
3.3	Catalytic Majorization	27
3.4	Continuous Variable Case	31
3.5	Proofs	34
<b>4</b>	<b>Classical Thermodynamics</b>	39
4.1	Second Law and the KL Divergence	39
4.2	Single-Shot Work Bound	44
<b>5</b>	<b>Quantum Entropy and Divergence</b>	51
5.1	Quantum State and Dynamics	51
5.2	von Neumann Entropy and the Quantum KL Divergence	55
5.3	Quantum Rényi Entropy and Divergence	59
<b>6</b>	<b>Quantum Majorization</b>	65
6.1	Quantum Majorization	65
6.2	Noisy Operations	67
6.3	Quantum d-Majorization	69
6.4	Remark on Resource Theory of Entanglement	71

<b>7</b>	<b>Approximate and Asymptotic Majorization and Divergence</b> .....	73
7.1	Smooth Divergence and Approximate Majorization .....	74
7.2	Information Spectrum and Asymptotic Majorization .....	76
7.3	Quantum Asymptotic Equipartition Property .....	80
7.4	More on the Smoothing .....	85
<b>8</b>	<b>Quantum Thermodynamics</b> .....	89
8.1	Nonequilibrium Free Energy .....	89
8.2	Thermal Operations and Gibbs-Preserving Maps .....	90
8.3	Clock and Work Storage .....	94
8.4	Average Work Bound .....	96
8.5	Single-Shot Work Bound: Exact Case .....	102
8.6	Single-Shot Work Bound: Approximate Case .....	104
8.7	Single-Shot Work Bound: Asymptotic Case .....	109
8.8	Trace-Nonincreasing Formulation .....	112
	<b>Appendix A: General Quantum Divergences and Their Monotonicity</b> .....	117
	<b>Appendix B: Hypothesis Testing</b> .....	135
	<b>Appendix C: Classical Asymptotic Equipartition Properties</b> .....	141
	<b>References</b> .....	145
