Acknowledgments *xviii*

1 An Introduction to Values and Science 1
Kevin C. Elliott and Ted Richards

PART I
Theoretical Background on Values and Science **21**

2 Feminist Challenges to the Value-Free Ideal of Science 23
Kristen K. Intemann

3 Standpoint Theory 34
Kristina Rolin

4 Values and Objectivity 42
Inkeri Koskinen

5 Arguments Against the Value-Free Ideal 52
Kevin C. Elliott

6 Recent Arguments for the Ideal of Value-Free Science 63
Matthew J. Brown

7 What Does It Mean to Say that Science is Value-Laden? 74
Zina B. Ward

8 Aesthetic Values in Scientific Practice: Contemporary Debates 84
Milena Ivanova

9 Representational Risk Revisited 95
Stephanie Harvard and Eric Winsberg

PART II
Managing Values in Science **107**

10 Reflecting on Responses to the New Demarcation Problem 109
Bennett Holman and T.Y. Branch

11 An Intermediate Approach to Value Management 120
Wendy S. Parker

12 Democracy, Consensus, and the Value-Free Ideal 131
Tarun Menon and Jacob Stegenga

13 Critical Contextual Empiricism 141
Kirstin Borgerson

14 Values in Global Science and the Relevance of Geographic Diversity 151
Juliana Gutiérrez Valderrama

15 The Limits of Diversity in Science: The Case of Human Microbiome Research 162
Abigail Nieves Delgado, Jan Baedke, and Ann-Christin Fischer

16 Transparency in Science 175
Stephen John

PART III
Values, Science, and Democracy **187**

17 Scientific Knowledge as a Public Resource: Arguments and Challenges for a Democratic Approach to Values in Science 189
S. Andrew Schroeder

18 Measuring the Public's Values: Are the Data Adequate for Purpose? 199
Karen Kovaka

19 FDA Evidentiary Standards and the Need to Attend to Stakeholders' Values 209
Inmaculada de Melo-Martín

20 Science and Democracy 220
Hannah Hilligardt and Torsten Wilholt

21 Science and Religion in a Democratic Society 231
Yiftach Fehige

22 Values in Science in Nondemocratic Contexts 241
Karoliina Pulkkinen

23 Science and Social Justice 252
Heather Douglas

24 Algorithmic Abolitionism and the Racial Algorithm 263
Alexander Williams Tolbert

PART IV
Values, Science, Institutions, and Organizations **279**

25 The Values of Science Funding Institutions 281
Jamie Shaw

26 Values and Industry-Funded Research 294
Pedro Bravo

27 Epistemic Intimidation and Illegitimate Value Influences in Science 304
Manuela Fernández Pinto and Anna Leuschner

28 Networks and Values 315
Rebecca Korf and Cailin O'Connor

29 Valuing Partnerships in Agricultural Genomics Research: Using More Empirically Informed Philosophical Approaches to Advance the Science and Values Debates 326
Rachel A. Ankeny and Emily A. Buddle

30 Values and Assessment Reports on Climate Change 337
Ahmad Elabbar

31 Indigenous Peoples' Leadership in Environmental Science Assessments 348
Kyle Whyte and Pasang Yangjee Sherpa

32 Controversies in Vaccine Policy 363
Maya J. Goldenberg

33 Values and Dual Use Biomedical Research 374
David B. Resnik

PART V
Values in Scientific Activities **387**

34 Values and Measurement 389
Cristian Larroulet Philippi

35 Science, Values, and Race Correction 401
Zinhle Mncube

36 Value Overlaps in Transdisciplinary and Intercultural Collaboration 413
Charbel N. El-Hani and David Ludwig

37 Tragedy or Transition?: How Science and Values Matter for Climate Change Frames 425
Daniel Steel

38 Values in Science Communication Models 435
T.Y. Branch

39 Values in Research Ethics Education 444
Kristina Rolin

PART VI
Values in Specific Sciences **455**

40 "Every Cell Has a Sex": Sex Essentialism in Biomedical Research 457
Robyn Bluhm

41 Values in Human Genomics 467
Yasmin Haddad and Celso Neto

42 Philosophical Approaches to Values in Climate Science 478
Greg Lusk

43 The Power of Value-Laden Framing: Examples from Wildlife Conservation Research 489
Jacalyn M. Beck, Claire F. Hoffmann, Kelly Kapsar, and Robert A. Montgomery

44 Values in Economics 501
Elizabeth Anderson

45 Artificial Intelligence: Values, Governance, and Policy 511
Justin B. Biddle
