<i>List of figures</i>	<i>xi</i>
<i>List of tables</i>	<i>xii</i>
<i>List of boxes</i>	<i>xiv</i>

1 Getting started 1

What is research and why do we do it?	1
Why do we need to do research at all?	4
How does a research project start?	6
Formulating the broad research question	10
The role of the supervisor	13
The international dimension of the researcher	15
Summary	18
Student experiences	19
Exercise: Your preferred approach to research	21
Review questions	22
References	23

2 Developing academic reading skills 27

Why academic reading?	27
How do you know you have a paper worth reading?	28
Reading the paper	29
Extracting value from your reading	36
SQ3R: A technique for effective academic reading	39
Academic reading from an international student's perspective	40
Summary	42
Review questions	42
Exercise: Reading	43
References	50

3	Developing literature review skills	51
	Locating the sources of your literature	51
	Defining the initial parameters of a search	52
	Conducting the main search and filtering the results	54
	Organizing your results	56
	Documenting your literature review	60
	Referencing your sources	64
	Articulating the research aim	71
	The international dimension of literature review	72
	Summary	74
	Student experiences	75
	Exercise: Literature maps	79
	Academic journals in hospitality and tourism	82
	Review questions	85
	References	86
4	Research philosophies, approaches and strategies	91
	Research philosophies: Positivism and phenomenology	91
	Research approaches: Deduction and induction	95
	Quantitative vs qualitative research	98
	Mixed methods	99
	Research strategies	101
	The international dimension in choosing a methodology	112
	Summary	114
	Review questions	115
	References	116
5	Sampling	119
	What is sampling?	119
	Probability sampling	121
	Non-probability sampling	127
	Sample size	132
	The problem of non-response	133
	Sampling in qualitative research	135
	Sampling bias	136
	Summary	138
	Review questions	139
	References	141
6	Data collection techniques	143
	Interviews	143
	Observation	158
	Questionnaires	164
	Content analysis of documents	173

Increasing the credibility of your research	176
Summary	177
Review questions	178
References	179
7 Experimental research design	181
Research question and variables	182
Testable hypotheses	183
Designing the experiment	183
Ethical considerations in experimental design	199
Summary	200
Review questions	201
References	202
8 Writing your research proposal	205
Section one of the proposal	205
Section two of the proposal	210
Section three of the proposal	213
Closing your proposal: The appendix	222
Summary	223
Student experiences	224
Review questions	225
References	226
9 Conducting the fieldwork	229
Negotiating access to the organizations	229
Professional conduct in the interview setting	232
The international dimension	235
Student experiences	237
Summary	240
Review questions	241
References	242
10 Analysis of qualitative data	243
Qualitative data	243
Different approaches to qualitative data analysis	244
Using computer-assisted qualitative data analysis software (CAQDAS)	251
The international dimension: Language and 'language equivalence'	256
Summary	258
Review questions	259
Annex: Extended example of inductive analysis	259
References	275

11 Analysis of quantitative data	279
Scales in quantitative analysis	280
Organizing, coding and entering data for analysis	284
Analysing quantitative data	288
Summary	325
Review questions	326
References	330
12 Writing up the dissertation	333
Cover page, abstract, acknowledgements and contents	334
Introduction	335
Literature review chapters	336
The research design chapter	337
Presenting and discussing your findings	338
Conclusions and implications	339
The last chapter: Introduction revisited	341
The final touches	341
Other presentation conventions	343
Summary	344
Turning a dissertation into an academic paper	345
Review questions	348
References	348
<i>Index</i>	349
