

Contents

1	The Beginning	1
1.1	The Basics of Combinatorics	2
1.1.1	Permutations	2
1.1.2	Variations With Repetition	3
1.1.3	Variations Without Repetition	4
1.1.4	Combinations	4
1.2	Putting Objects into Bins	4
1.2.1	Indistinguishable Balls in Numbered Bins	5
1.2.2	Distinguishable Balls in Numbered Bins	5
1.2.3	Indistinguishable Balls in Indistinguishable Bins	6
1.2.4	Exercises	6
2	The General Definition of Probability	9
2.1	Families of Sets	9
2.1.1	Exercises	11
2.2	The Sample Space	12
2.2.1	Exercises	12
2.3	The General Definition of Probability	13
2.3.1	Basic Properties of Probability	14
2.3.2	Exercises	17
2.4	Why the Probability Space $(\Omega, \mathbf{P}, \mathcal{F})$ Must Consist of Three Elements	18
2.4.1	Exercises	20
2.5	The Classical Definition of Probability	21
2.5.1	Exercises	22
2.6	Geometric Probability	25
2.6.1	Exercises	28
2.7	Conditional Probability	28
2.7.1	Exercises	31
2.8	Independent Events	33
2.8.1	Exercises	33

2.9	Bernoulli Trials	34
2.9.1	Most Probable Number of Successes	35
2.9.2	The Black and White Hats Puzzle	38
2.9.3	Exercises	39
2.10	Upper and Lower Limits of Sequences of Events	40
2.10.1	Exercises	42
3	Random Variables and Their Distributions	45
3.1	Definition of a Random Variable	45
3.1.1	Exercises	49
3.2	Distributions and Cumulative Distribution Functions	50
3.2.1	Exercises	55
3.3	Review of Discrete Distributions	56
3.3.1	Single Point Distributions	56
3.3.2	Two-Point Distributions	57
3.3.3	Binomial Distributions or Bernoulli Distributions	57
3.3.4	Multinomial Distributions	58
3.3.5	Poisson Distributions	58
3.3.6	Geometric Distributions	58
3.3.7	Pascal (Negative Binomial) Distributions	59
3.3.8	Hypergeometric Distributions	59
3.3.9	Exercises	60
3.4	Continuous Type Distributions	60
3.4.1	Uniform Distributions on an Interval	62
3.4.2	Exponential Distributions	62
3.4.3	Gamma Distributions	63
3.4.4	Beta Distributions	64
3.4.5	Cauchy Distributions	65
3.4.6	Gaussian Distributions	65
3.4.7	Exercises	67
3.5	A Complete Description of the Types of Random Variables	68
3.6	Independent Random Variables	71
3.6.1	Exercises	72
3.7	Multidimensional Random Variables and Distributions	74
3.7.1	Exercises	78
4	Expected Value for Random Variables	81
4.1	Expected Value for Simple Random Variables	81
4.1.1	Exercises	85
4.2	General Definition of Expected Value	86
4.2.1	Exercises	95
4.3	Functions of Random Variables	96
4.3.1	Exercises	97
4.4	Expected Value for Continuous Type Random Variables	98
4.4.1	Exercises	100

4.5	Expected Value as a Lebesgue–Stieltjes Integral	100
4.5.1	Exercises	101
5	Random Variable Parameters	103
5.1	Quantiles, Median, Moments, Variance, Skewness and Kurtosis ...	103
5.1.1	Exercises	107
5.2	Chebyshev's Inequality	108
5.2.1	Exercises	110
5.3	Parameters of Random Vectors	111
5.3.1	Copulas	113
5.3.2	H. Markowitz's Investing Theory	114
5.3.3	Exercises	115
5.4	Multivariate Normal Distribution	116
5.4.1	Exercises	118
6	Characteristic Functions	121
6.1	Definition and Basic Properties	121
6.1.1	Exercises	123
6.2	Relations Between Distribution, Characteristic Function and Moments of Random Variables.....	125
6.2.1	Exercises	130
6.3	Weak Convergence of Distributions	131
6.3.1	Exercises	138
6.4	Characteristic Functions of Random Vectors.....	139
6.4.1	Exercises	141
7	Limit Theorems	143
7.1	Kolmogorov's Zero-One Law	143
7.1.1	Exercises	144
7.2	Laws of Large Numbers	145
7.2.1	Exercises	152
7.3	The Central Limit Theorem	153
7.3.1	Exercises	154
8	Extension of Measure	157
8.1	The Carathéodory Extension Theorem	157
8.1.1	Exercises	164
8.2	Cumulative Distribution Functions	165
8.3	The Radon–Nikodym Theorem	170
8.3.1	Exercises	173
8.4	Conditional Expectation	173
8.4.1	Conditional Expectation Properties	174
8.4.2	Exercises	177

9 Hints and Solutions to the Exercises	179
Appendix Table of Normal Distribution Function Φ of $N(0, 1)$	199
