## Part I Foundations of Conservation Biology 1

### 1 The State of Our Planet 3

State of the Human Species 4

State of the Global Environment 7

Land 7

Climate 9

Oceans 11

Freshwater 11

State of the World's Biodiversity 13

Global extinctions 13

Local extirpations 14

Population decay 15

Mass mortality events 15

Genetic diversity 16

Biotic homogenization 16

**Seeds of a Good Anthropocene 17**

Six reasons to be optimistic 17

The next generation of champions 20

**Box 1.1 Success Story**

The Indian Rhino 21

### 2 The Rise of Conservation Biology 25

Origins of Conservation 26

Premodern societies 26

First game and nature reserves 29

Foundations of forest conservation 30

Foundation of the "national park" 31

Intellectual foundations in the United States 34

**Box 2.1 Success Story**

Marine Protected Areas 34

Contemporary Conservation Biology 39

Formation of conservation biology as a discipline 41

The conservation biology explosion 41

Core principles and values of conservation 43

**Box 2.2 Challenges & Opportunities**

Two Views on the Functional Postulates (Core Principles) and Normative Postulates (Core Values) of Conservation Biology 45

**Structured Decision Making 47**

**Box 2.3 Conservation in Practice**

Structured Decision Making (SDM) 49

### 3 Biodiversity Concepts and Measurement 53

Hierarchical Levels of Biodiversity 54

Genetic Diversity 55

Sources of genetic variation 55

Measures of genetic diversity 57

Species Diversity 58

The species concept 59

**Box 3.1 Conservation in Practice**

Naming and Classifying Species 60

Measures of species diversity 62

Functional Traits and Phylogenetic Diversity 66

Community and Ecosystem Diversity 67

Trophic structure 68

Food web complexity 71

Species composition 73

**Box 3.2 Success Story**

Reintroduction of Beavers 74

**Box 3.3 Conservation in Practice**

Quantifying Biodiversity at Multiple Spatial Scales 76

**The Multiple Scales of Biodiversity 77**

## 4 Global Patterns and Drivers of Biodiversity 81

### Biodiversity through Geologic Time 82

*Formation of early life* 82

*Radiation events* 82

*Historical extinctions* 84

### Global Patterns of Biodiversity 87

*How many species are there?* 87

#### Box 4.1 Case in Point

Discovery of a New Way to Make Life 89

#### Box 4.2 Success Story

Rediscovery of an Extinct Species 90

#### Box 4.3 Case in Point

Discovery of the Human Biome 92

*Realms, biomes, and ecoregions* 93

*The most diverse ecoregions* 93

*Biodiversity hotspots* 96

*Latitudinal gradients* 97

### Drivers of Biodiversity 99

*Evolutionary drivers* 99

*Ecological drivers* 105

*Synopsis* 110

## Part II Importance of Biodiversity 115

## 5 The Many Values of Biodiversity 117

### Values and Ethics 118

### Types of Value Systems 119

*Intrinsic values* 120

#### Box 5.1 Success Story

The Public Makeover of Sharks 124

#### Box 5.2 Case in Point

Religion and Conservation 126

*Instrumental values* 126

*Relational values* 129

### Ethical Worldviews 135

*Anthropocentrism* 135

*Biocentrism* 136

*Ecocentrism* 137

## 6 Biodiversity and Ecosystem Services 141

### What Are Ecosystem Services? 143

### History of Ecosystem Services 143

*Ecosystem valuation* 144

*Biodiversity and ecosystem function* 146

*The Millennium Ecosystem Assessment* 147

### Types of Ecosystem Services 149

*Supporting services* 150

*Provisioning services* 153

*Regulating services* 157

#### Box 6.1 Success Story

How New York City Keeps Its Drinking Water Clean 159

#### Box 6.2 Case in Point

Wetland Loss and Hurricane Katrina 163

*Cultural services* 164

*Alternative frameworks* 168

### Biotic Control of Ecosystem Services 169

*Functional traits* 170

*Biodiversity* 171

#### Box 6.3 Challenges & Opportunities

The Dilution Effect 175

### Ecosystem Markets and Payments for Ecosystem Services 177

## 7 Ecological Economics 181

### Principles of Ecological Economics 182

### Decision-Making Analyses 185

*Cost-effectiveness analysis* 186

*Cost-benefit analysis* 187

*Multicriteria decision analysis* 190

### Total Economic Value (TEV) Framework 192

*Direct use value* 193

*Indirect use value* 194

*Option value* 194

*Existence value* 194

**Box 7.1 Case in Point**

The Option Value of Biodiversity 195  
*Estimates of TEV* 196

**Methods of Valuing Ecosystem Services 198**

*Revealed preference methods* 198  
*Real market techniques* 199

**Box 7.2 Conservation in Practice**

An Example of the Market Pricing Method:  
 Fisheries and Pollution 201

*Surrogate market techniques* 203

*Cost-based techniques* 204

*Stated preference methods* 206

**Box 7.3 Success Story**

Contingent Valuation Helps Reduce Human-Wildlife  
 Conflict 208

*Benefits transfer method* 209

**One Final Comment 209****Box 7.4 Challenges & Opportunities**

Taking Anthropocentrism to the Extreme 210

**Part III Threats to Biodiversity 213****8 Extinction 215****Global Patterns of Endangerment 216**

*The IUCN Red List* 216

**Box 8.1 Conservation in Practice**

The IUCN Red List 217

*Estimates of global extinction* 221

**Box 8.2 Challenges & Opportunities**

Are We Entering the Sixth Mass Extinction? 224

**Drivers of Extinction 226**

*Habitat loss* 226

*Overexploitation* 227

*Invasive alien species* 227

*Climate change* 228

*Most threatening factors* 228

**Local Changes in Biodiversity 230**

*Species-area relationships* 230

*Empirical measures* 233

*Better monitoring and assessment programs* 236

**Box 8.3 Success Stories**

Citizen Science and Biodiversity Monitoring 239

**Controls of Extinction Risk 240**

*Demographic parameters* 240

**Box 8.4 Case in Point**

Why Are Frogs and Toads Croaking? 241

*Ecological controls* 242

*Life-history traits* 243

*Stochastic processes* 245

**9 Habitat Loss, Fragmentation, and Degradation 249****Habitat Loss 250**

*Primary drivers of habitat loss* 251

**Box 9.1 Challenges & Opportunities**

Land Sharing versus Land Sparing 254

**Box 9.2 Success Story**

The Rise, Fall, and Resurrection of Detroit 257

*Habitat loss by biome* 260

**Box 9.3 Case in Point**

The Unsustainable Use of Palm Oil 263

*Future development threats* 267

**Habitat Fragmentation 269**

*Biological consequences of fragmentation* 270

*Species-specific responses to fragmentation* 276

**Habitat Degradation 277**

*Pollution* 277

*Desertification* 283

*Erosion and sedimentation* 284

**Metapopulations and Landscape Mosaics 285**

*The "classic" metapopulation model* 286

*Source-sink dynamics* 287

*Conservation of metapopulations* 288

**Box 9.4 Conservation in Practice**

The Mainland-Island Metapopulation Model 289

## 10 Overexploitation 293

History of Overexploitation 294

Psychology of Overexploitation 297

Types of Overexploitation 299

*Commercial exploitation* 299

### Box 10.1 Challenges & Opportunities

No Fish Left, or Let Us Eat Fish? 303

### Box 10.2 Conservation in Practice

CITES: The Convention on International Trade in  
Endangered Species of Wild Fauna and Flora 306

*Subsistence overexploitation* 314

*Recreational overexploitation* 317

### Box 10.3 Success Story

The Taimen Conservation Project 322

## Theory of Sustainable Harvesting 322

*Sustainable yield* 323

*Fixed quota (Q) harvesting* 324

*Fixed effort (proportional) harvesting* 325

*Limitations of MSY models* 326

## 11 Invasive Alien Species 329

Overview of the Problem 330

The Population Biology of IAS 333

*Introduction of alien species* 334

*Establishment of alien species* 338

*Spread of invasive alien species* 341

### Box 11.1 Conservation in Practice

Predicting an Invasive Alien Species Wave Front 342

Impacts of Invasive Alien Species 343

*Impacts on biodiversity* 343

*Impacts on ecosystems* 348

*Economic impacts* 349

*Positive values of IAS* 351

### Box 11.2 Challenges & Opportunities

Should Species Be Judged by Their Origin,  
or by What They Do? 353

Management and Control 354

### Box 11.3 Success Story

To Catch a Goat 355

*Risk assessment* 356

*Risk management* 361

## 12 Climate Change 369

Anthropogenic Climate Change 370

Predicted Response to Climate Change 374

*Methods and models* 375

*Current forecasts* 378

### Box 12.1 Conservation in Practice

Toward Mechanistic Climate Envelope Models 378

Documented Responses to Climate Change 382

*Population decay and local extirpation* 382

### Box 12.2 Case in Point

Meet the First Species to Go Extinct Because of  
Anthropogenic Climate Change 383

*Geographic range shifts* 384

*Altered phenologies* 386

*Biome regime shifts and alternative states* 388

*Change in ecosystem services* 389

Managing Effects of Climate Change on  
Biodiversity 392

*Establishing refugia and safe havens* 393

*Optimizing migration pathways* 395

*Building evolutionary resilience* 396

### Box 12.3 Challenges & Opportunities

Assisted Colonization: A Key Tool for Conservation,  
or Pandora's Box? 397

*Using biodiversity for climate mitigation* 398

*Developing green infrastructure* 398

### Box 12.4 Success Story

China's Sponge City Program: Using Green Infrastructure  
to Mitigate Natural Disasters 400

## Part IV Approaches to Conservation 403

### 13 Species-Level Conservation 405

#### ■ Box 13.1 Success Story

Record-Breaking Recovery: Island Foxes of California 406

#### Goals of Species-Level Conservation 408

#### Challenges to Conserving

##### Small Populations 409

*Demographic stochasticity* 410

*Environmental stochasticity* 411

*Loss of genetic variability* 413

##### Effective Population Size 415

*Determining effective population size* 415

*Unequal sex ratio* 416

*Variation in reproductive output* 417

*Population fluctuations and bottlenecks* 417

##### Extinction Vortices 420

##### Estimating Population Size 421

*Census* 421

#### ■ Box 13.2 Conservation in Practice

Estimating Animal Density: The Distance Sampling Approach 423

*Capture-mark-recapture techniques* 424

#### ■ Box 13.3 Case in Point

Detector Dogs Support Research and Conservation Efforts 425

#### Models of Population Size 426

*Geometric growth model* 427

*Exponential growth model* 429

*Logistic growth model* 429

*Age- and stage-based models* 430

*Stochastic models* 433

#### Predicting Population Persistence 434

*Minimum population size* 434

*Population viability analysis* 436

#### Conservation Trade-Offs 440

### 14 Community and Ecosystem Conservation 445

#### Classification of Protected Areas 446

*Strict nature reserves and wilderness areas (Category I)* 446

*National parks (Category II)* 448

*Natural monuments (Category III)* 448

*Habitat/species management area (Category IV)* 448

*Protected landscape/seascape (Category V)* 448

*Managed resource protected area (Category VI)* 449

#### Global Status of Protected Areas 449

#### Approaches for Choosing Protected Areas 453

*Hotspots of biodiversity* 453

*Ecoregions* 455

#### ■ Box 14.1 Case in Point

Conserving Half: A Bold Agenda for Conservation 457

*Political and economic boundaries* 457

*Ecosystem services* 458

*Areas of cultural importance* 459

#### Effectiveness of Protected Areas 461

*Terrestrial protected areas* 461

*Marine protected areas* 463

#### ■ Box 14.2 Success Story

Innovative Partnerships Protect One of Earth's Last Remaining Marine Wilderness Areas 464

#### Impacts on Human Well-Being 466

#### Predictors of Success 469

*Effective management* 469

*Stakeholder and community involvement* 471

*Integrated social development and conservation goals* 472

#### ■ Box 14.3 Challenges & Opportunities

Fences and Fines ... or ... Integrated Conservation and Development? 474

## 15 Landscape-Scale Conservation 477

### Creating Networks of Protected Areas 479

*Establishing new protected areas* 479

*Criteria used to select and prioritize new protected areas* 481

#### ■ Box 15.1 Success Story

Indigenous Protected and Conserved Areas: The Right to Decide 482

*Tools used to optimize selection of protected areas* 487

#### ■ Box 15.2 Conservation in Practice

Decision-Making Algorithms 488

### Connecting Individual Protected Areas into Networks 493

*Incorporating unprotected areas into conservation plans* 497

*Conservation opportunities in urban habitat* 499

*Conservation opportunities in agricultural habitat* 502

*Conservation opportunities in mixed-use habitat* 504

### Managing the Conservation Landscape 506

*Monitoring* 506

*Modeling* 510

*Ecosystem-based management* 511

### Landscape-Scale Challenges 515

#### ■ BOX 15.3 Case in Point

Community-Based Natural Resource Management 516

## 16 Ex Situ Conservation 521

#### ■ Box 16.1 Case in Point

A Comprehensive Conservation Plan Saved the Giant Panda 523

### Ex Situ Conservation Facilities 524

*Zoos and aquariums* 524

*Botanical gardens* 531

*Gene banks and seed banks* 534

### Contributions to In Situ Conservation 538

*Captive-breeding programs* 538

#### ■ Box 16.2 Challenges & Opportunities

Resurrection Science: Should Extinct Species Be Brought Back to Life? 541

#### ■ Box 16.3 Conservation in Practice

Measuring Inbreeding and Outbreeding 543

*Reintroduction and reinforcement* 544

#### ■ Box 16.4 Success Story

Reintroduction Programs That Saved Species from Extinction 546

*Public education and engagement* 549

### Final Thoughts on Ex Situ Conservation 551

## 17 Conservation and Sustainable Development 555

### What Is Sustainable Development? 556

#### International Efforts to Achieve Sustainable Development 558

*The United Nations* 558

*International conventions* 560

#### Funding for Sustainable Development 565

*The World Bank* 565

*Global Environment Facility* 567

*Individual governments* 568

*Non-governmental organizations* 570

#### ■ Box 17.1 Challenges & Opportunities

China's Belt and Road Initiative 570

#### ■ Box 17.2 Success Story

Snow Leopard Enterprises 572

### Examples of Sustainable Development Projects 573

*Ecotourism and biodiversity* 573

*Illegal wildlife trade* 574

#### ■ Box 17.3 Case in Point

Should the Ban on Elephant Ivory Trade Be Lifted? 575

*Fisheries* 576

*Climate change* 577

### The Future Success of Sustainable Development 578

#### ■ Box 17.4 Conservation in Practice

The Social Progress Index 582

### Concluding Remarks 583
