Contents

Part I Biotechnology, Bioproducts & Bioenergy

Recent Developments in Biorefinery with Special Focus on Industrial Biotechnology 3
Thomas Hahn and Susanne Zibek

Biorefineries Based on Coupling of Wastewater and Microalgae: Developments of Algal Biotechnology 15
Ulrike Schmid-Staiger and Konstantin Frick

Progress on "Piñafibre" Project: Unlocking the Potential of Dual-Purpose Crop by the Utilization of Pineapple Leaf Fibers for Bio-Based Textiles 25
Isabel Moreno, Mauricio Fernando Martínez, Daniel Ortiz, Yohana Mora, Oscar Paredes, Yaneth Patricia Ramos, Carol Puentes, Kevin Rodríguez, Marie Bolger, and Tobias Wojciechowski

Use of Basidiomycetesin the Valorization of Agro-Waste as an Alternative in Implementing the Circular Bioeconomy 31
Guadalupe Gutiérrez-Soto, Iosvany López-Sandin, and Roberto Parra Saldivar

Extracellular Compounds of Arthrospira platensis Under L-Tryptophan Supplementation: UHPLC Coupled with Mass Spectrometry (ESI-QTOF-MS) Identification 35
Natali López-Mejía, Ana Lucía Rangel Luna, Geison Modesti Costa, Hugo Alexander Martínez Correa, and Hugo Fabian Lobatón García

Study of Agro-Industrial Residues from Rice and Oil Palm from the Southeast Region of Colombia: Characterization, Annual Waste Generation, and Energy Potential 41
Sergio Andrés Morales Restrepo, Luis Sebastián Mendoza Castellanos, Ana Lisbeth Galindo Noguera, and Karina Angélica Ojeda Delgado

Development of Microbial Cellulose Dressings from Coffee Mucilage: A Matrix for Controlled Topical Drug Delivery 47
Ingrith Carolina Flórez García, Víctor Alfonso Solarte David, and Silvia Milena Becerra Bayona

Extraction of Pectin from Citrus Wastes in Santander (Colombia) 53
Walter Pardavé Livia and Paula Mendoza Rojas

Influence of Different Growing Media on *Arthrospira platensis* Biomass Yield 59
Natalia Andrea Plata Ramírez, Jasmín Lorena Durán-Ortiz, and Alexander Meneses-Jácome

Technological Roadmap for Sustainable Hydrogen Production from Lignocellulosic Biomass Gasification for Energy Applications: A Perspective 65
Katerine Angélica Serrano, Yurley Paola Villabona Durán, Karina Angelica Ojeda Delgado, Ciro Eduardo Rozo Correa, and Luis Sebastián Mendoza Castellanos

Testing the Biochemical Potential of Methane of Aqueous Glycerol Solutions Using Sludge from the Effluent Treatment System of Palm Oil Mills as Inoculum 69
Omar Alberto Ávila Rojas and Alexander Meneses-Jácome

Part II Circular Bioeconomy Concepts and Bioeconomy for Food Security

Perspective on Coupled Agricultural Systems for a Profitable and Sustainable Production of High-Quality Food Proteins 77
Lukas Simon Kriem and Adna Saletovic

Bioeconomy: Agro and Food Security 89
Maria del Pilar Márquez Cardona

BioInsectonomy: A Circular Agrifood Economy Based on Insects as Animal Feed 95
Karol B. Barragán-Fonseca

The Bioeconomy in Colombia from the Perspective of the Colombian Research Center: "AGROSAVIA" 101
Carolina González-Almario

Circular Bioeconomy to Lead an Enhanced Strategy for Sustainable Aquaculture: CiBELESα 105
Tatiana C. Guarín C., Lorena Durán-Ortiz, Sebastián Muñoz-Chinome, Astrid Hernandéz-Rincón, Yohana Castro-Hernández, and Alexander Meneses-Jácome

Food Security and Sustainability Based on Alternative Proteins from Insects in the Santander Region (Colombia): A Perspective 113
Yudy Mariana Alfaro-Wisaquillo

Part III Other Bioeconomy and General Sustainability Topics

Exploration of Life Cycle Assessment as Driver of Circular Economy Strategies in the Drinking Water Sector: A Literature Outlook 117
Fabián E. González-Esteban and Alexander Meneses-Jácome

Using Animation Technologies to Improve the Interrelation Between Bird's Conservation and Nature Tourism 123
Daniel Tello and Olga Ocampo

Advances and Perspectives in Processing Techniques and Artificial Intelligence Methods for Biomedical Signal Analysis 129
Hernando González, Carlos Julio Arizmendi, and Beatriz F. Giraldo

Solar Desalination and the Application of the Life Cycle Analysis Method: A Mini-Review 135
Brayan Eduardo Tarazona-Romero, Alexander Meneses-Jácome, Yecid Alfonso Maldonado-Muñoz, and Alvaro Campos-Celador

Environmental Peace and Bioeconomy: A Case Study of Initiatives in Ciudad Bolívar, Bogotá DC 141
Ramon Gabriel Aguilar Vega
