

# Contents

<b>1 Definitions of Quasiconformal Mapping in the Plane .....</b>	<b>1</b>
1.1 Introduction.....	1
1.2 Regular Quasiconformal Mapping .....	3
1.3 Geometric Definition of Quasiconformal Mapping.....	8
1.4 Quasiconformal Mapping and Extremal Length.....	11
1.5 Quasiconformal Mapping and Ring Module.....	16
1.6 Extremals of Ring Modules.....	25
1.7 Analytic Definition of Quasiconformal Mapping.....	33
<b>2 Measurable Riemann Mapping Theorem.....</b>	<b>41</b>
2.1 Introduction.....	41
2.2 Existence and Regularity of Solution of Beltrami Equation in $\mathbb{C}$ .....	42
2.3 Existence and Regularity of Solution of Beltrami Equation in $\Omega \subset \mathbb{C}$ .....	51
<b>3 Extension and Distortion of Quasiconformal Mapping .....</b>	<b>55</b>
3.1 Introduction.....	55
3.2 Extension to a Domain Boundary .....	57
3.3 Extensions by Reflection and other Extensions.....	62
3.4 Quasiconformal Curves .....	64
3.5 Sewing at a Jordan Curve .....	71
3.6 Distortion by Quasiconformal Mapping in a Disk.....	72
3.7 Circular Dilatation.....	80
3.8 Quasiconformity of Monotone Functions .....	84
3.9 Application to Leau-Fatou Conjugacy .....	91
<b>4 Holomorphic Motions .....</b>	<b>93</b>
4.1 Introduction.....	93
4.2 Holomorphic Motions and Quasiconformal Mappings.....	95
4.3 Holomorphic Motions of Julia Sets .....	97
4.4 Extension of Holomorphic Motion to the Closure of a Domain ...	98

4.5	Extension of Holomorphic Motion to $\mathbb{C}_\infty$ .....	99
4.6	Unique Extension of Holomorphic Motion to $\mathbb{C}_\infty$ .....	108
<b>5</b>	<b>Stability and Bifurcation in Complex Dynamics</b> .....	129
5.1	Introduction.....	129
5.2	Quasiconformal, Topological, Postcritical and Julia Stability .....	130
5.3	Structural Stability and Hyperbolicity.....	139
5.4	Instability of Rational Functions with a Herman Ring .....	141
<b>6</b>	<b>Quasiconformal Surgery and Complex Dynamics</b> .....	149
6.1	Introduction.....	149
6.2	Hyperbolic Components of Mandelbrot set .....	150
6.3	Sullivan Nonwandering Domains Theorem .....	154
6.4	Modifying the Multiplier of Attracting Periodic Orbit .....	158
6.5	Modifying Superattracting to Attracting Orbits.....	160
6.6	Modifying a Rotation Ring Module .....	162
6.7	Making a Herman Ring from a Siegel Disk.....	166
6.8	General Principle of Quasiconformal Surgery .....	169
6.9	Sewing a Siegel Disk at an Invariant Jordan Curve.....	171
6.10	Polynomial-Like Functions .....	173
6.11	Upper Bound of Number of Attracting or Neutral Periodic Orbits.....	183
6.12	Upper Bound of Number of Herman Ring Cycles.....	188
6.13	Making a Herman Ring Cycle from a Siegel Disk Cycle .....	194
6.14	Optimal Upper Bound of Number of Cycles.....	196
6.15	Sewing a <i>Continuum</i> in a Julia Set .....	199
6.16	Characterization of Components of Julia Sets .....	204
<b>7</b>	<b>Dimensions of Mandelbrot Set Boundary and of Julia Sets</b> .....	211
7.1	Introduction.....	211
7.2	Écalle Cylinders .....	214
7.3	Hausdorff and Hyperbolic Dimensions .....	234
7.4	Dimension of the Mandelbrot Set Boundary.....	239
7.5	Generic Dimension of the Julia Set of $z^2 + c$ .....	248
<b>8</b>	<b>Postcritically Finite Rational Functions and Combinatorial Equivalence</b> .....	251
8.1	Introduction.....	251
8.2	Branched Coverings.....	255
8.3	Combinatorial Equivalence .....	257
8.4	Orbifolds.....	259
8.5	Teichmüller Space of $\mathbb{C}_\infty$ Marked by a Subset .....	262
8.6	Characterization of Postcritically Finite Rational Maps.....	265
<b>9</b>	<b>Teichmüller Spaces of Riemann Surfaces</b> .....	315
9.1	Introduction.....	315
9.2	Quasiconformal Mappings in Teichmüller Space.....	316

9.3	Modular Group of Riemann Surface .....	323
9.4	Differential in a Riemann Surface .....	324
9.5	Conformal Structures in Riemann Surfaces.....	325
9.6	Universal Teichmüller Space .....	327
9.7	Geodesics in Teichmüller Space of Riemann Surface Covered by $\mathbb{H}$ .....	330
9.8	Schwarzian Derivatives and Quadratic Differentials .....	332
9.9	Equivalence of Teichmüller Spaces Metrics .....	334
9.10	Bers Embedding .....	336
9.11	Foliations .....	338
<b>10</b>	<b>Teichmüller Spaces of Dynamical Systems .....</b>	<b>347</b>
10.1	Introduction.....	347
10.2	Teichmüller Space of Holomorphic Dynamical System.....	348
10.3	Conformal Barycenter and Barycentric Extension .....	351
10.4	Quasiconformal Isotopies .....	356
10.5	Teichmüller Space of a Rational Dynamical System .....	364
<b>A</b>	<b>Elements of Lebesgue Integral and Measure .....</b>	<b>369</b>
A.1	Introduction.....	369
A.2	Bounded Variation and Absolutely Continuous Functions and Fundamental Theorem of Calculus .....	372
A.3	Volume Derivative and Integrability of Homeomorphism Jacobians.....	381
A.4	Banach Spaces $L^p$ .....	392
A.5	Loeman-Menchoff Theorem.....	396
<b>B</b>	<b>Elements of Distributions .....</b>	<b>401</b>
B.1	Introduction.....	401
B.2	Space of Test Functions .....	403
B.3	Definition and Basic Properties of Distributions.....	407
B.4	Limit, Derivatives, and Product of Distributions .....	411
<b>C</b>	<b>Fourier Transform in the Plane .....</b>	<b>417</b>
<b>D</b>	<b>Partially Absolutely Continuous Functions with Derivatives in <math>L^2_{\text{loc}}</math> .....</b>	<b>427</b>
<b>E</b>	<b>Existence and Differentiability of Partial Derivatives .....</b>	<b>433</b>
<b>F</b>	<b>Invertible Continuous Functions and Global Inverse Function Theorem .....</b>	<b>437</b>
<b>G</b>	<b>Projections and Separating Hyperplanes of Convex Sets .....</b>	<b>441</b>
<b>H</b>	<b>Extension of Schwarz Lemma .....</b>	<b>449</b>

<b>Bibliography .....</b>	453
<b>Authors Index .....</b>	455
<b>Index .....</b>	459
