Preface ix

Supplements xi

Acknowledgements xiii

The Roots of Calculus xxi

1 Limits and Continuity 1

1.1 Limits (An Intuitive Approach) 1
1.2 Computing Limits 15
1.3 Limits at Infinity; End Behavior of a Function 23
1.4 Limits (Discussed More Rigorously) 33
1.5 Continuity 43
1.6 Trigonometric Functions 54
1.7 Inverse Trigonometric Functions 64
1.8 Exponential and Logarithmic Functions 71

2 The Derivative 88

2.1 Tangent Lines and Rates of Change 88
2.2 The Derivative Function 98
2.3 Introduction to Techniques of Differentiation 111
2.4 The Product and Quotient Rules 119
2.5 Derivatives of Trigonometric Functions 125
2.6 The Chain Rule 130

3 Differentiation 141

3.1 Implicit Differentiation 141
3.2 Derivatives of Logarithmic Functions 149
3.3 Derivatives of Exponential and Inverse Trigonometric Functions 154
3.4 Related Rates 162
3.5 Local Linear Approximation; Differentials 170
3.6 L'Hôpital's Rule; Indeterminate Forms 179

4 The Derivative in Graphing and Applications 192

4.1 Analysis of Functions I: Increase, Decrease, and Concavity 192
4.2 Analysis of Functions II: Relative Extrema; Graphing Polynomials 204
4.3 Analysis of Functions III: Rational Functions, Cusps, and Vertical Tangents 214
4.4 Absolute Maxima and Minima 225
4.5 Applied Maximum and Minimum Problems 233
4.6 Rectilinear Motion 248
4.7 Newton's Method 256
4.8 Rolle's Theorem; Mean-Value Theorem 263

5 Integration 278

5.1 An Overview of the Area Problem 278
5.2 The Indefinite Integral 284
5.3 Integration by Substitution 294
5.4 The Definition of Area as a Limit; Sigma Notation 302
5.5 The Definite Integral 313
5.6 The Fundamental Theorem of Calculus 322
5.7 Rectilinear Motion Revisited Using Integration 336
5.8 Average Value of a Function and Its Applications 345
5.9 Evaluating Definite Integrals by Substitution 350
5.10 Logarithmic and Other Functions Defined by Integrals 357

6 Applications of the Definite Integral 374

6.1 Area Between Two Curves 374
6.2 Volumes by Slicing; Disks and Washers 382
6.3 Volumes by Cylindrical Shells 392
6.4 Length of a Plane Curve 399
6.5 Area of a Surface of Revolution 404

6.6 Work 410
6.7 Moments, Centers of Gravity, and Centroids 419
6.8 Fluid Pressure and Force 428
6.9 Hyperbolic Functions and Hanging Cables 434

7 Principles of Integral Evaluation 448

7.1 An Overview of Integration Methods 448
7.2 Integration by Parts 451
7.3 Integrating Trigonometric Functions 460
7.4 Trigonometric Substitutions 469
7.5 Integrating Rational Functions by Partial Fractions 475
7.6 Using Computer Algebra Systems and Tables of Integrals 484
7.7 Numerical Integration; Simpson's Rule 494
7.8 Improper Integrals 509

8 Mathematical Modeling with Differential Equations 524

8.1 Modeling with Differential Equations 524
8.2 Separation of Variables 531
8.3 Slope Fields; Euler's Method 543
8.4 First-Order Differential Equations and Applications 550
8.5 Predator-Prey Model 558

9 Parametric and Polar Curves; Conic Sections 567

9.1 Parametric Equations; Tangent Lines and Arc Length for Parametric Curves 567
9.2 Polar Coordinates 580
9.3 Tangent Lines, Arc Length, and Area for Polar Curves 594
9.4 Conic Sections 604
9.5 Rotation of Axes; Second-Degree Equations 623
9.6 Conic Sections in Polar Coordinates 628

10 Infinite Series 643

10.1 Sequences 643
10.2 Monotone Sequences 655
10.3 Infinite Series 663
10.4 Convergence Tests 672
10.5 The Comparison, Ratio, and Root Tests 680
10.6 Alternating Series; Absolute and Conditional Convergence 687
10.7 Maclaurin and Taylor Polynomials 697
10.8 Maclaurin and Taylor Series; Power Series 709
10.9 Convergence of Taylor Series 718
10.10 Differentiating and Integrating Power Series; Modeling with Taylor Series 728

11 Three-Dimensional Space; Vectors 745

11.1 Rectangular Coordinates in 3-Space; Spheres; Cylindrical Surfaces 745
11.2 Vectors 751
11.3 Dot Product; Projections 763
11.4 Cross Product 774
11.5 Parametric Equations of Lines 785
11.6 Planes in 3-space 792
11.7 Quadric Surfaces 801
11.8 Cylindrical and Spherical Coordinates 811

12 Vector-Valued Functions 821

12.1 Introduction to Vector-Valued Functions 821
12.2 Calculus of Vector-Valued Functions 828
12.3 Change of Parameter; Arc Length 838
12.4 Unit Tangent, Normal, and Binormal Vectors 848
12.5 Curvature 854
12.6 Motion Along a Curve 862
12.7 Kepler's Laws of Planetary Motion 876

13 Partial Derivatives 888

13.1 Functions of Two or More Variables 888
13.2 Limits and Continuity 899
13.3 Partial Derivatives 912
13.4 Differentiability, Differentials, and Local Linearity 926
13.5 The Chain Rule 938
13.6 Directional Derivatives and Gradients 949
13.7 Tangent Planes and Normal Vectors 960
13.8 Maxima and Minima of Functions of Two Variables 967
13.9 Lagrange Multipliers 979

14 Multiple Integrals 991

14.1 Double Integrals 991
14.2 Double Integrals over Nonrectangular Regions 999
14.3 Double Integrals in Polar Coordinates 1009
14.4 Surface Area; Parametric Surfaces 1017
14.5 Triple Integrals 1031
14.6 Triple Integrals in Cylindrical and Spherical Coordinates 10039
14.7 Change of Variables in Multiple Integrals; Jacobians 1049
14.8 Centers of Gravity Using Multiple Integrals 1062

15 Vector Calculus 1076

15.1 Vector Fields 1076
15.2 Line Integrals 1085
15.3 Independence of Path; Conservative Vector Fields 1102
15.4 Green's Theorem 1113
15.5 Surface Integrals 1121
15.6 Applications of Surface Integrals; Flux 1128
15.7 The Divergence Theorem 1138
15.8 Stokes' Theorem 1148

A Appendices

A Trigonometry Review (Summary) A1
B Functions (Summary) A9
C New Functions from Old (Summary) A12
D Families of Functions (Summary) A17
E Inverse Functions (Summary) A24

Ready Reference RR1

Index I1

Web Appendices (online only)

A Trigonometry Review
B Functions
C New Functions From Old
D Families of Functions
E Inverse Functions
F Real Numbers, Intervals, and Inequalities
G Absolute Value
H Coordinate Planes, Lines, and Linear Functions
I Distance, Circles, and Quadratic Equations
J Solving Polynomial Equations
K Graphing Functions Using Calculators and Computer Algebra Systems
L Selected Proofs
M Early Parametric Equations Option
N Mathematical Models
O The Discriminant
P Second-Order Linear Homogeneous Differential Equations

Chapter Web Projects: Expanding the Calculus Horizon (online only)

Robotics — Chapter 2
Railroad Design — Chapter 7
Iteration and Dynamical Systems — Chapter 9
Comet Collision — Chapter 10
Blammo the Human Cannonball — Chapter 12
Hurricane Modeling — Chapter 15
