

Contents

Preface	vii
1 Basic Notions	1
1.1 Outcomes and Events	1
1.2 Probability of Events	4
1.3 Independence and Conditioning	8
1.4 Counting Models	15
1.5 Exercises	21
2 Discrete Random Variables	27
2.1 Probability Distribution and Expectation	27
2.2 Remarkable Discrete Distributions	41
2.3 Generating Functions	50
2.4 Conditional Expectation I	62
2.5 Exercises	70
3 Continuous Random Vectors	77
3.1 Random Variables with Real Values	77
3.2 Continuous Random Vectors	91
3.3 Square-integrable Random Variables	110
3.4 Gaussian Vectors	118
3.5 Conditional Expectation II	125
3.6 Exercises	133
4 The Lebesgue Integral	141
4.1 Measurable Functions and Measures	141
4.2 The Integral	150
4.3 Basic Properties of the Integral	156
4.4 The Big Theorems	161
4.5 Exercises	172
4.6 Solutions	175
5 From Integral to Expectation	181
5.1 Translation	181
5.2 The Distribution of a Random Element	183
5.3 Characteristic Functions	185
5.4 Independence	190
5.5 Conditional Expectation III	193

5.6	General Theory of Conditional Expectation	200
5.7	Exercises	208
5.8	Solutions	212
6	Convergence Almost Sure	221
6.1	A Sufficient Condition and a Criterion	221
6.2	The Strong Law of Large Numbers	225
6.3	Kolmogorov's Zero-one Law	235
6.4	Related Types of Convergence	235
6.5	Uniform Integrability	240
6.6	Exercises	243
7	Convergence in Distribution	247
7.1	Paul Lévy's Criterion	247
7.2	The Central Limit Theorem	252
7.3	Convergence in Variation	256
7.4	The Rank of Convergence in Distribution	261
7.5	Exercises	264
8	Martingales	267
8.1	The Martingale Property	267
8.2	Martingale Inequalities	273
8.3	The Optional Sampling Theorem	279
8.4	The Martingale Convergence Theorem	285
8.5	Square-integrable Martingales	298
8.6	Exercises	301
9	Markov Chains	309
9.1	The Transition Matrix	309
9.2	Recurrence	328
9.3	Long-run Behavior	345
9.4	Absorption	352
9.5	The Markov Property on Graphs	359
9.6	Monte Carlo Markov Chains	365
9.7	Exercises	374
10	Poisson Processes	381
10.1	Poisson Processes on the Line	381
10.2	Generalities on Point Processes	388
10.3	Spatial Poisson Processes	395
10.4	Operations on Poisson Processes	408
10.5	Exercises	411
11	Brownian Motion	419
11.1	Continuous-time Stochastic Processes	419
11.2	Gaussian Processes	426
11.3	The Wiener-Doob Integral	434
11.4	Two Applications	438
11.5	Fractal Brownian Motion	443
11.6	Exercises	446

12 Wide-sense Stationary Processes	449
12.1 The Power Spectral Measure	449
12.2 Filtering of wss Stochastic Processes	453
12.3 The Cramér-Khinchin Decomposition	459
12.4 Multivariate wss Stochastic Processes	468
12.5 Exercises	475
A A Review of Hilbert Spaces	479
Bibliography	487
Index	489
