PREFACE: WHAT IS AN ANTI-TEXTBOOK?	xvi
Why it matters	xvii
Why not just teach the alternative views?	xvii
This book is not anti-mainstream economics	xviii
Who is this book intended for?	xviii
Acknowledgments	xx
About the author	xxi

PART I INTRODUCTION

I WHAT IS MACROECONOMICS?	3
1 THE STANDARD TEXT	3
1.1 Three ways in which macro differs from micro	3
1.2 The business cycle (and other important concepts)	4
1.3 Long-run growth	5
1.4 Inflation and deflation	7
1.5 The open economy	8
2 THE ANTI-TEXT	9
2.1 Why macroeconomics is necessary: the fallacy of composition	9
2.2 Why is the fallacy of composition is downplayed in mainstream textbooks?	11
2.3 The birth of modern macro: the Great Depression	14
2.4 Classical economics and the Keynesian breakthrough	17
2.5 Keynes's General Theory	18
2.6 Digging deeper into the paradox of thrift	20
2.7 Schools of thought within macroeconomics	23
2.8 The great moderation	26
2.9 Final remark	28

2 MEASUREMENT, Mismeasurement AND OMISSION	29
1 THE STANDARD TEXT	29
1.1 Measuring output	29
1.2 Measuring real output	31
1.3 Real GDP, measurement issues, and economic well-being	32
1.4 Price indices and the inflation rate	33
1.5 The unemployment rate	36
2 THE ANTI-TEXT	39
2.1 Introduction: conspiracy Theories and fake news	39
2.2 The measurement of inflation	39
2.3 The measurement of unemployment	44
2.4 The significance of unemployment	47
2.5 The measurement of value-added	49
2.6 GDP as a measure of well-being	50
2.7 The measurement of investment	51
2.8 Conclusion	52

PART 2

LONG-RUN ECONOMIC GROWTH

3 GROWTH: WHAT WE KNOW AND WHAT WE DON'T	57
1 THE STANDARD TEXT	57
1.1 Introduction	57
1.2 The crucial importance of productivity	58
1.3 The production function and growth accounting	59
1.4 What about natural resources?	60
1.5 Public policy: savings and investment	60
1.6 Two implications of diminishing returns	61
1.7 Other public policy measures to stimulate growth	62
1.8 Is world population sustainable?	63
1.9 Resources and the environment	64
1.10 Conclusion	65
2 THE ANTI-TEXT	66
2.1 The extent of our ignorance	66
2.2 Debunking the aggregate production function	66
2.3 Critical evaluation of textbook policies to promote growth	69
2.4 Is world population growth sustainable?	74
2.5 Sustainability: the doomsters versus the growth men	75
2.6 The climate emergency	76
2.7 Summary	84

4 GROWTH: HAPPINESS AND INEQUALITY	87
1 THE STANDARD TEXT	87
2 THE ANTI-TEXT	87
2.1 Does more income make us happier?	88
2.2 The effects of inequality on growth	91
2.3 The effects of inequality on well-being	94
2.4 Increasing inequality and its causes	96
2.5 Inequality and the dynamics of capitalism: Piketty's analysis	102
2.6 Conclusion	107
5 THE FINANCIAL SYSTEM: THE BELLY OF THE BEAST	109
1 THE STANDARD TEXT	109
1.1 Introduction	109
1.2 Financial markets	109
1.3 The efficient market hypothesis	111
1.4 Financial institutions	112
1.5 Savings and investment in a closed economy	113
1.6 The market for loanable funds in a closed economy	114
1.7 Using the loanable funds model to evaluate public policy	115
1.8 Savings and investment in an open economy	116
1.9 The market for loanable funds in an open economy	118
1.10 Inflation and interest rates	119
1.11 Summary	120
2 THE ANTI-TEXT	121
2.1 Introduction	121
2.2 Macroeconomic instability and the financial system	121
2.3 Minsky's financial instability hypothesis	122
2.4 Minsky's super-cycle in the United States	124
2.5 A critique of the EMH	127
2.6 The loanable funds market: information and efficiency	130
2.7 The financial industry is too big	132
2.8 The truth about savings	133
2.9 The truth about investment	135
2.10 Concluding remarks	136
APPENDIX: THE VALUE OF A PERPETUITY	137

PART 3
SHORT-RUN FLUCTUATIONS

6 SHORT-RUN MACRO MODELS: A REVOLUTION THAT MISFIRED	141
1 THE STANDARD TEXT	141
1.1 Introduction	141
1.2 The AE model	142
1.3 Understanding stability	145
1.4 Understanding equilibrium	146
1.5 Unpacking planned AE	146
1.6 The multiplier effect in a simplified model	148
1.7 Aggregate demand	150
1.8 Short-run aggregate supply	153
1.9 Long-run aggregate supply	153
1.10 Equilibrium and stability in the AD–AS model	154
1.11 Supply shocks pose a policy dilemma	155
1.12 Conclusion	155
2 THE ANTI-TEXT	156
2.1 Is mainstream macro any different to classical economics?	156
2.2 Probing the slope of the AD line	158
2.3 An upward sloping AD line and the self-correcting economy	163
2.4 Corridors of stability	165
2.5 Conclusion	166
7 FISCAL POLICY: WHY DEFICITS AND DEBT MIGHT NOT MATTER	167
1 THE STANDARD TEXT	167
1.1 Introduction	167
1.2 Income-expenditure multipliers allowing for taxes and imports	169
1.3 Automatic stabilizers	172
1.4 The cyclically adjusted budget	173
1.5 Factors that reduce the size of the income-expenditure multiplier	174
1.6 Supply-side effect of taxes	176
1.7 Timing problems when using discretionary fiscal policy	178
1.8 Long-run issues: deficits and debt	179
1.9 Concluding thoughts: fiscal policy versus monetary policy	180
2 THE ANTI-TEXT	181
2.1 Introduction: the lack of a consensus	181
2.2 The problem of evidence: the stimulus debate of 2009	182
2.3 The problem of evidence: Ricardian equivalence	183

2.4	The problem of evidence: the austerity debate of 2010	184
2.5	The effects of austerity on output and debt	187
2.6	The necessity for government deficits in a “real balance sheet” recession	188
2.7	Does the national debt ever need to be paid off?	190
2.8	The MMT view on debt and deficits	193
2.9	Timing issues	197
2.10	Supply-side effect of taxes	198
2.11	Conclusion	200
	APPENDIX: DEBT DYNAMICS	201
8	MONEY AND BANKING: CRONY CAPITALISM AND THE CORRUPTION IT BREEDS	203
1	THE STANDARD TEXT	203
1.1	What is money?	203
1.2	Banking	204
1.3	Government oversight of banks	206
1.4	How banks create money	207
1.5	Central banks	209
1.6	Monetary policy tools	211
1.7	Interest rate targets versus money supply targets	214
1.8	The financial crisis of 2007–8	215
1.9	What actions were taken	217
1.10	Financial reform in the United States	218
1.11	Conclusion	218
2	THE ANTI-TEXT	219
2.1	What is money?	220
2.2	Why does the quantity of money matter?	221
2.3	Banking irregularities: the incompetent, the immoral, and the illegal	222
2.4	Criminal wrongdoing	224
2.5	Why did no big bank CEOs go to jail?	226
2.6	The economic contribution of the financial sector	229
2.7	Evaluating the renewed regulation	232
2.8	A brief assessment of the bailouts	235
2.9	Conclusion	237
	APPENDIX 1: MAJOR BANK SCANDALS REVEALED SINCE THE SUBPRIME MELTDOWN	238
	APPENDIX 2: THE WALL STREET -WASHINGTON REVOLVING DOOR (GS DENOTES GOLDMAN SACHS)	243

9 MONETARY POLICY: THE FIXATION ON INFLATION	245
1 THE STANDARD TEXT	245
1.1 The liquidity preference model	245
1.2 Longer-term interest rates	248
1.3 The monetary transmission mechanism	249
1.4 Monetary policy and stabilization policy	250
1.5 Inflation targeting	251
1.6 The zero lower bound and quantitative easing	253
1.7 Monetary neutrality: output and prices in the long run	254
2 THE ANTI-TEXT	256
2.1 The limits of conventional monetary policy	256
2.2 The limits of QE	257
2.3 The limits of other monetary policy options	260
2.4 The fundamental problem of inflation targeting	263
2.5 The need for a dual mandate	265
2.6 The need for a green mandate!	268
2.7 Long-run monetary neutrality: the quantity theory rides again!	269
2.8 Conclusion	270
10 INFLATION AND UNEMPLOYMENT: THE POLITICAL ECONOMY OF UNEMPLOYMENT	271
1 THE STANDARD TEXT	271
1.1 The Phillips curve	271
1.2 Lipsey's (1960) micro-underpinning to the Phillips curve	271
1.3 The Phillips curve as a dynamic aggregate supply curve	273
1.4 What determines the long-run inflation rate?	275
1.5 Accelerating inflation	276
1.6 The standard Phillips curve in inflation-unemployment space	277
1.7 The determinants of the NRU	278
1.8 Explaining historical observations of inflation and unemployment	281
1.9 The costs of disinflation	282
1.10 The danger of deflation	284
1.11 Hyperinflation: cause and cure	284
1.12 Conclusion	286
2 THE ANTI-TEXT	286
2.1 The possibility of a nonvertical LRPC	287
2.2 The possibility of not enough jobs	289
2.3 The possibility of fragile equilibria	290
2.4 The NRU assumes an irrelevant and inappropriate market structure	292

2.5 Evidence on the NRU: problems predicting inflation and deflation	295
2.6 Evidence on the NRU: wild gyrations of the NRU	297
2.7 Alternatives to the neoclassical consensus #1: a post-Keynesian view	298
2.8 Alternatives to the neoclassical consensus #2: Roger Farmer's view	304
2.9 Alternatives to the neoclassical consensus #3: Richard Lipsey's new view	306
2.10 Achieving genuinely full employment	307
2.11 Conclusion	309

PART 4
CONCLUSION

II SUMMING UP	313
1 THE OVEREMPHASIS ON PERFECTLY COMPETITIVE MARKETS	313
2 HYSTERESIS AND MULTIPLE EQUILIBRIA	315
3 THE MISFIRING OF THE KEYNESIAN REVOLUTION	315
4 THE EMPHASIS ON LONG-RUN EQUILIBRIUM	316
5 THE NEGLECT OF UNCERTAINTY	317
6 THE ADDICTION TO GROWTH	318
7 BLINDNESS TO OUR CHALLENGES	318
8 A FINAL COMMENT	319
POSTSCRIPT: CLIMATE CHANGE, THE COVID PANDEMIC, AND GENUINELY FULL EMPLOYMENT	321
Notes	325
